

Announcement:

Inhabitech Partners with eLivelihood

Providing eLivelihood customers with peace of mind about their loved one's health without having to leave the Elder Care Solution application.

[Inhabitech](#) and [eLivelihood](#) are happy to announce a partnership where Hestia[®], from Inhabitech, will be used to provide the passive health monitoring capability in the eLivelihood [Complete Elder Care Solution](#).

Starting in January 2019 this will be the second local Colorado partnership for Inhabitech.

Both eLivelihood and Inhabitech were recent speakers and presenters at the [#AgingWell conference in Boulder](#) on 2nd November 2018 and are active members of the startup community in the Front Range.

[eLivelihood](#)

Developed a collaborative application, the Elder Care Solution, that helps families manage the care, finances, and health, of their aging parents. Keeping seniors engaged and syncing their care with the family.

[Inhabitech](#)

Is a company focused on creating products and services that support better aging experiences.

Hestia[®] is Inhabitech's flagship product, a system designed to provide insights into your loved one's health and wellness.

For more information about partnership opportunities, or to talk about aging well through the use of smart technologies, please contact Inhabitech, LLC. at Info@Inhabitech.com.
